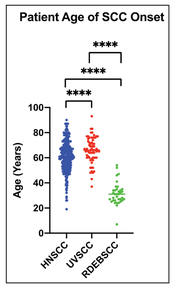
BACKGROUND

- Recessive dystrophic epidermolysis bullosa (RDEB) is a debilitating genetic disorder caused by mutations in the COL7A1 gene.

Fleming et al., 2009



Tartaglia et al., 2021

- RDEB patients are at high risk of developing squamous cell carcinomas (SCC), which result in high mortality
- Skin changes associated with aging shares many similarities with RDEB:
  - ultrastructural changes
  - defects in wound healing
  - increased inflammation
- Patients with RDEB show early onset of SCC

HYPOTHESIS

We hypothesize that accelerated skin aging contributes to early onset of SCC in RDEB.

METHODS

Patient
- Blood, skin and SCC tumor were obtained from a female RDEB patient who developed SCC in her second decade of life.

Sequencing
- Whole genome sequencing (WGS) performed on blood, skin, SCC tumor
- RNA sequencing (RNAseq) performed on skin and SCC tumor

Variant Calling & Annotation
- DeepVariant (Poplin et al., 2018)
- MuTect (Cibulskis et al., 2013)

Mutational Signature Analysis
- deconstructSig R package (Rosenthal et al., 2016)

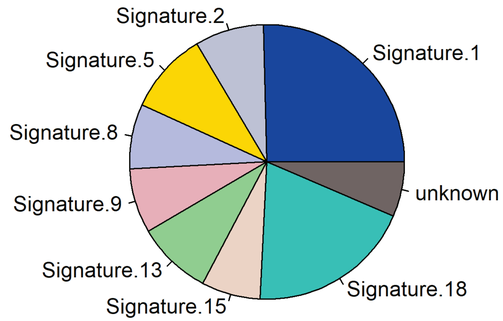
Gene Ontology Analysis
- enrichGO in clusterProfiler R package (Yu et al., 2012)

RESULTS

Table 1. Germline COL7A1 pathogenic variants

HGVS	Gene region	Germline mutation	Effect	Prediction	Source
NM_000094.4:c.1564C>T	Exon 12	Yes	Stop codon	Pathogenic	ClinVar
NM_000094.3:c.3551-3T>G	Intron 26	Yes	Abnormal splicing	Likely pathogenic	Kern et al., 2006

Figure 1. Mutational signatures in SCC compared to skin



Annotation:
- Signature 1 & 5: clock-like signatures, associated with age in various cancers
- Signature 2 &13: APOBEC signatures, major mutational mechanism in human cancers
- Signature 9: associated with somatic hypermutation in lymphoid cells
- Signature 15: associated with defective DNA mismatch repair & microsatellite instability
- Signature 18: associated with damage from reactive oxygen species

FMO5	SLC45A4
NFATC2	STXBP6
OCA2	TPPP
PDZD2	TPPP3

CONCLUSIONS

Our pilot study points to a possibility that skin aging-associated transcriptional changes might contribute to RDEB-associated SCC development.
